

Lakewood's Design-Build Digester Improvements Beneficial Biogas Presentation and Facility Tour

Join us for a joint DBIA/NESOWEA YP event showcasing design-build done right for a complex wastewater treatment plant upgrade project. The City of Lakewood's Wastewater Treatment Plant (WWTP) recently overhauled their digester and while reclaiming energy through dual fired boilers and a combined heat and power (CHP) system. The event will begin with tours of the facility led by plant staff, design-build project manager, and design manager. The tours will be followed by a presentation by Lakewood and the design-builder discussing WWTP background, project background, the Design-Build approach, the construction improvements, and operational information (pre and post project). The night will be capped off with networking, food, and drinks.

Participants will receive contact hours from DBIA and OWEA.

When – July 10th, 2024.

- Tours begin at 2:30 pm
- Presentation at 4:30. Networking to follow
